DUMPER JET

www.zallys.com

DUMPER JET is a professional electric wheelbarrow designed to work with loads up to 500 kg / 1102 lbs.

It gives the user confidence, increasing the handiness in the manoeuvre operations and is ideal to cover daily operations.

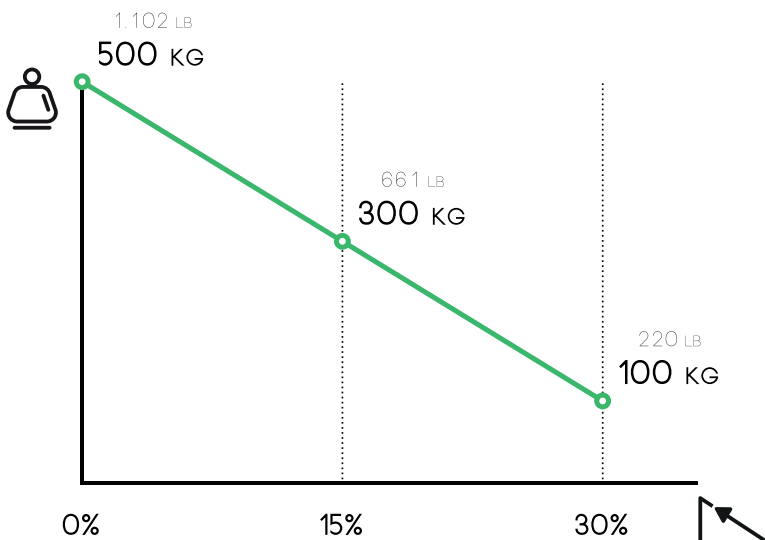

The semi-automatic tilting of the skip is helped by an electronic system that controls the forwarding or the backing speed guided by a knob accelerator, making the discharge secure and practical even in closed environments, respecting the anti pollution normative for the noise and exhaust fumes emission.

The tilting system of the Dumper gives the possibility to equip and change rapidly different types of accessories, depending on the expected use.

Our electric vehicles are not only CE certified but, more than 80% of the range is covered by the UL certification, which guarantees its suitability to the standards applicable in relation to potential risk of fire, electric shock and mechanical hazards.
